Thornaby Pool

Swimming Pool

- Below average (relative to new -but has been refurbished)
- 25m 5 lanes (1.8 – 0.9m) – formerly 33m
- Original pool side tiles ok
- c.80 seats – 40 per side – pool enclosed by barrier
- Popular/well used for school swimming
- Low ceiling – all lighting working
- New roof
- Pool plant and Air Handling Units working ok

Changing rooms

- Below average.
- M/F, group change within each
- Family change
- No specific disability area in either

Used regularly by Thornaby swim club but unlikely to prove viable in the long term, people think it is going to close. The Trust needs to make savings of £150k for next year. Although it is located towards the edge of Thornaby it probably only draws its custom from the Thornaby area. If the pool was to go (from TAL management) there would be the possibility of a community management option.

STOCKTON-ON-TEES BOROUGH COUNCIL INDOOR, BUILT AND SPECIALIST FACILITIES STRATEGY REPORT

Sporting future: a new strategy for an active nation measuring the outputs (extract taken from Government strategy).

An important shift in this strategy is the move beyond participation in sport and winning medals as the only outputs we want to encourage. Both are clearly very important and are retained in our new strategy, but sport has other ways of delivering the overall outcomes. Recognising and understanding how sport makes a positive difference through broader means will help the sector to deliver the five outcomes more effectively. We have designed a set of indicators for each output to support this new way of thinking.

The data that underpin these KPIs will be drawn from a variety of sources including the new Active Lives survey, the Taking Part survey, the Monitor of Engagement with the Natural Environment survey¹ and the Sport Satellite Account as well as being gathered by UK Sport and Sport England through the course of their work.

More People Taking Part in Sport and Physical Activity

Taking part in sport and physical activity contributes to all of the outcomes of this strategy. To make the link to physical wellbeing in particular as strong as possible, we will measure both taking part in sport and levels of physical inactivity. This will also help ensure an adequate focus on under-represented groups in the population whose sporting behaviour we will monitor as part of the population-level KPI on taking part. The barriers to taking part for these groups are likely to be greater and so changes in behaviour may initially be slower. However, we would ultimately like to see a faster rate of change among under-represented groups than the population as a whole. We expect Sport England to provide the right incentives to tackling under-representation through their performance management approach.

Given the evidence of the enhanced impact on mental wellbeing of exercising outdoors, we will monitor taking part in this way. To get more people to enjoy an active lifestyle, we need to support children and young people to develop the confidence and skills to take part and to be positive about sport and activity. We will therefore also have specific KPIs for 5-18 year olds to track this alongside their behaviour.

Key Performance Indicators

KPI 1 – Increase in percentage of the population taking part in sport and physical activity at least twice in the last month

KPI 2 – Decrease in percentage of people physically inactive (KPI 1 and 2 from *Active Lives* survey)

KPI 3 – Increase in the percentage of adults utilising outdoor space for exercise/ health reasons (MENE survey)

KPI 4 – Increase in the percentage of children achieving physical literacy standards

KPI 5 – Increase in the percentage of children achieving swimming proficiency and Bikeability Levels 1-3

STOCKTON-ON-TEES BOROUGH COUNCIL INDOOR, BUILT AND SPECIALIST FACILITIES STRATEGY REPORT

KPI 6 – Increase in the percentage of young people (11-18) with a positive attitude towards sport and being active (KPI 4, 5 and 6 from *Taking Part*)

More People Volunteering in Sport

Volunteering has previously been treated like any factor that supports participation. But volunteering is different as it allows the volunteer themselves to benefit from the outcomes we are seeking. We will therefore measure how many people are volunteering in sport. As this is a complex area to measure accurately Sport England will take time to design and test the right questions and introduce them to *Active Lives* in 2016.

Key Performance Indicators

KPI 7 – Increase in the number of people volunteering in sport at least twice in the last year (from *Active Lives* survey)

KPI 8 – The demographics of volunteers in sport to become more representative of society as a whole (from *Active Lives* survey and ONS population data)

More People Experiencing Live Sport

People who regularly turn up and experience live sport, particularly when they support a specific team or athlete, can experience improved wellbeing or greater community engagement.

This strategy is not about getting people to watch sport on television instead of taking part in sport. Activity under this heading must clearly and demonstrably contribute to the overall outcomes to the same extent as participating or volunteering in sport.

Key Performance Indicators

KPI 9 – Number of people who have attended a live sporting event more than once in the past year (from *Active Lives* survey)

Maximising International Sporting Success

The public's support for the UK's Olympic and Paralympic athletes is incredibly high and the results of UK Sport's recent strategy review showed continued support for the 'no compromise' principle that has underpinned Olympic and Paralympic investment since 1996. We do not need to change the overall output being sought here. We will, however, ensure that the link between Olympic and Paralympic success and the overall outcomes for the public is clear and incentivised through our continued support for elite sport.

There are some sports that either do not feature in the Olympic or Paralympic Games or whose highest international achievement is not at the Olympic or Paralympic Games. Despite this, there is still significant value to be gained and a significant contribution to be made to delivering the outcomes from success at the highest level in these sports and we will measure our overall performance.

Key Performance Indicators

KPI 10 – Number of Olympic and Paralympic medals won at Summer and Winter Games

KPI 11 – Position in Olympic and Paralympic Summer and Winter medal tables

STOCKTON-ON-TEES BOROUGH COUNCIL INDOOR, BUILT AND SPECIALIST FACILITIES STRATEGY REPORT

KPI 12 – UK/Home Nation performance in pinnacle World, European or

Commonwealth competitions (provided by UK Sport)

Maximising Domestic Sporting Success

Domestic success can also inspire and therefore can be part of getting more people involved in sport. It can also provide the positive wellbeing and social benefits that international sporting success brings along with the economic benefits from ticket sales, merchandising and attracting tourists.

Key Performance Indicators

KPI 13 – Average attendance levels at national-level domestic sport

Maximising the Impact of Major Events

The UK has a strong track record of delivering world class major sporting events and this is something we want to continue, for the vital role many events play in preparing our athletes for the Olympic and Paralympic Games, for the economic impact they can bring and the potential to inspire those that experience the events themselves. In ensuring these benefits are maximised, we can ensure that major events continue to play an important role in the overall success of sport in this country.

Key Performance Indicators

KPI 14 – Attendance at events supported through government and UK Sport major events programmes

KPI 15 – Economic impact of events supported through government and UK Sport major events programmes (both from UK Sport figures)

A More Productive Sport Sector

A more productive sport sector will be one that maximises its available resources and assets (including facilities, skills and workforce) and contributes directly to economic development. By ensuring it can be more productive, the sector can better deliver everything else in this strategy.

Key Performance Indicators

KPI 16 – Employment in the sport sector (from Sport Satellite Account)

KPI 17 – Position of the UK in the *Nation Brands Index*, both a) overall and b) in answer to the specific question about the UK excelling at sport (from *the Anholt-GfK Roper Nation Brands Index*)

KPI 18 – Percentage of publicly owned facilities with under-utilised capacity (through revised National Benchmarking Service)

A More Financially and Organisationally Sustainable Sport Sector

Financial and organisational sustainability are vital to build the strong foundation needed for successful delivery. This means that individual organisations and the sector as a whole must become more sustainable, including through robust governance and a capable workforce with a good pipeline of the right skills for the future.

STOCKTON-ON-TEES BOROUGH COUNCIL INDOOR, BUILT AND SPECIALIST FACILITIES STRATEGY REPORT

Key Performance Indicators

KPI 19 – Increase in the amount of non-public investment into sport bodies which are in receipt of public investment

KPI 20 – Increase in the number of publicly funded bodies that meet the new UK Sports Governance Code (collated annually by UK Sport and the Home Nations Sports Councils)

A More Responsible Sport Sector

A more responsible sport sector is one that makes sure that the people within it, whether playing, working, volunteering or watching, feel welcome and can do so safely. Sport should be inclusive and open to everyone that wants to take part, and also meet its responsibilities towards the rest of the sector, ensuring that organisations work in partnership and those areas that enjoy commercial success are able to support those for whom a commercial business model may not be feasible.

Key Performance Indicators

KPI 21 – Number of sports that meet the Sport and Recreation Alliance's Voluntary Code to reinvest 30% of their net UK television broadcasting revenues in grassroots sport (collated by the SRA)

KPI 22 – Headline results of the new Sport Workforce People Survey (Sport England benchmarking)

KPI 23 – Relevant indicator to be developed as part of Duty of Care review
